

# Business to Government Forum

16 October 2018, IFAT India 2018, Mumbai

## Circular Economy & Smart Resource Management

IFAT India is India's leading environmental trade fair for water, sewage, refuse and recycling. It will be an ideal platform for successful networking with representatives from the industries and municipal sectors. Exhibitors and visitors were equally satisfied and confirmed the importance of this trade fair for the highly promising market.

With growing urbanisation, industrialisation and steady population growth, there are urgent needs for investment in waste management, water and wastewater infrastructure in India. The aim of the forum is to provide Indian states an important platform to showcase their urban development initiatives, programmes and activities planned under the Swachh Bharat Mission (Clean India Mission) Smart Cities Mission, Amrut Mission and their state level activities. This platform shall also give states an opportunity to interact with international experts, technology providers as well as institutions and government representatives.

With a strong focus on Solid Waste Management, Water & Wastewater and Air pollution technologies IFAT India shall give the states the needed platform to present their upcoming projects, programmes, new tenders, issues, challenges, and opportunities in the Urban sector development. The forum will be organised by Indus Media with the support of IFAT India and other partners.

### The forum concept

1. Three hours presentation, question & answer session & panel discussion
2. Three or four State/City representatives from Urban developments
3. Possible States: SBM Director, Maharashtra, Uttar Pradesh, Tamil Nadu, Kerala, Gujarat, Rajasthan, Madhya Pradesh, Uttarakhand, Bihar, Orissa etc.
4. 20 minute presentation, by each state and cities
5. Release of new tenders
6. Technology innovations
7. Financial Models and Government Subsidies

### Join in the dialogue!

With growing urbanisation, industrialisation and steady population growth, there are urgent needs for investment in waste management, water and wastewater infrastructure in India.
